

# Car Park Fixtures

## Height Bars

Tactile Systems Australia vehicle height bars are available in 2 standard lengths - 3m and 5m.

They are constructed from fully welded steel and painted in high visibility yellow. Vehicle height bars help protect against damage to vehicles and property from oversize vehicles entering areas with restricted height.

Both sizes feature reflective diagonal stripes and LOW CLEARANCE wording with height advisory – such as 3.0m. (clearance height customised to suit actual install situation)

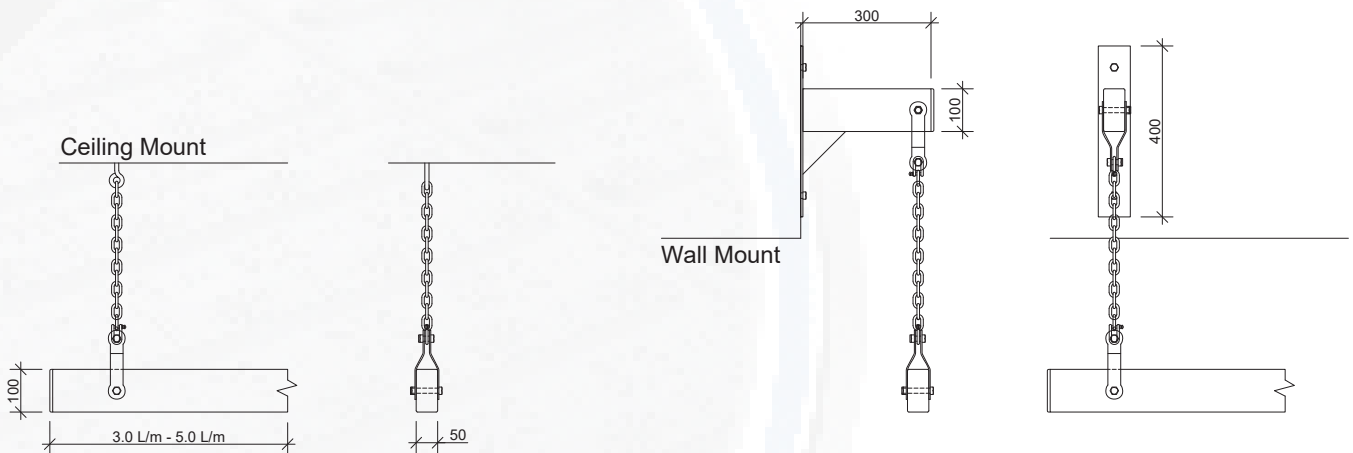

Two mounting options are available – ceiling mount assembly or wall mount assembly.

Tactile Systems height bars are 100% Australian made – as are the mounting options.

Dimensions:

5,000mm x 100 x 50mm

3,000mm x 100 x 50mm

1 YEAR PRODUCT WARRANTY

INSTALLATION SERVICE AVAILABLE
