

## Adhesive Hi-Strength Spray Primer TSA HS-SA-31

- Strong Bonding
- Wide temperature range -30 c to 95 C
- Variable width spray pattern
- Low odour
- Improves adhesion of tactile mats to concrete surfaces
- Easy clean nozzle saves adhesive
- Excellent general industrial spray primer
- Fast tacking time

### Instructions for use with Tactile Systems Poly Mats:

- Apply masking tape around the outside of the marked area.
- Shake the can well.
- Apply a thin and even coat to the surface where mats are to be applied.
- Make sure the entire area is covered – including right to the edge.
- Allow the adhesive to cure – about 10 minutes.
- Humid and/or cool conditions may require a longer drying period.
- Covers up to 25 Mats
