TSA Safety Rumble Bars

Rumble Bars are surface mounted that provide a visual and audible warning to deter motorists from certain areas or hazardous conditions.

Rumble bars are suitable for centre line, median, traffic island or bike lane marking or anywhere that high visibility separation is needed.

Tactile Systems rumble bars are from high grade recycled rubber, which will not chip, crack or break like concrete. They are easily installed via two preformed mounting holes. Four reflective lenses are built in for increased visibility in a wide range of conditions. Available in Yellow or Black.

TSA MS-2000 polymer construction adhesive is also suggested for extra secure fixing.

Dimensions:
300mm long
170mm wide
40mm high
2.5kg

1 YEAR PRODUCT WARRANTY
