

Car Park Fixtures

Speed Cushions - Rubber

Speed Cushion

Car park Fixtures

Tactile Systems Australia speed cushions are ideal for all types of areas where there is a need to slow or calm traffic.

Our rubber speed cushions are made from a high grade rubber and feature yellow panels for enhanced visibility.

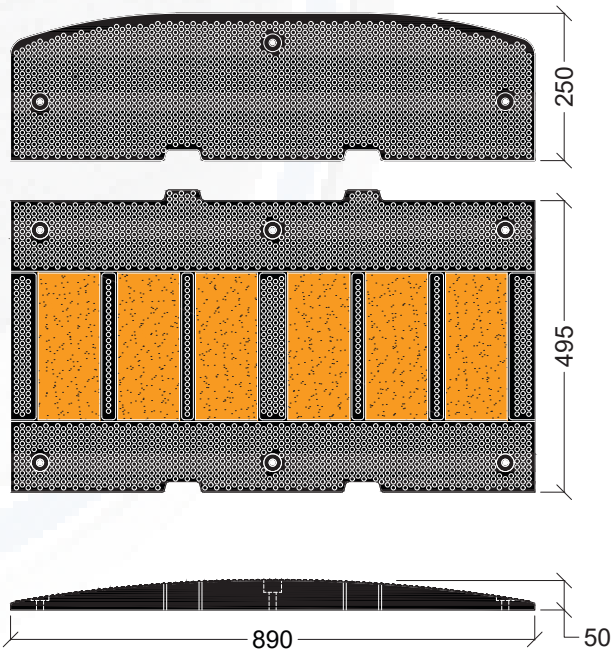

The interconnecting modular construction allows them to be installed across varied road widths easily and efficiently and finished off by connecting end caps to provide full coverage.

There are 6 fixing points per middle section and 3 per end cap to ensure a secure fixing to the road surface. 10mm x 80mm screw anchor fixings are also available for purchase.

10mm x 100mm FIXINGS
