

Tactile Indicators

Tactile Handrail Indicator

Tactile Systems Australia Tactile Handrail Indicators assist as a guide to the visually impaired where TGSI's are not required to be installed.

Manufactured from 316 grade polished stainless steel or high grade brass makes them highly durable as well as improving aesthetics and design appeal.

They feature a quick and efficient pressure fit install design and are designed to meet AS1428.4.1 specifications.

They are suitable for a wide range of handrails, and feature concealed fixings. Install method is by drilling a 5mm hole tapping into place using an install hammer.
