TSA 300mm X 300mm Installation Template - Flat Back Tactiles

Tactile Systems Australia 300mm x 300mm hazard templates are an easy to use system that enables multiple templates to be placed next to each other to cover the width of travel.

The holes are set out to meet the AS/NZ 1428.4.1 2009 Australian Standards.

These templates are specifically designed for installing tactiles without stems – known as flats.
