TSA Installation Drilling Template

300mm x 300mm

Tactile Systems Australia 300mm x 300mm hazard and directional installation templates are an easy to use system that locks together to extend to cover the width of travel. The holes are set out to meet the AS/NZ 1428.4.1 2009 Australian Standards and manufactured from ABS Plastic which was specifically chosen to withstand the harsh Australian conditions and built environment.

- Hazard or Directional versions available
- Designed for use with 8mm drill bits
- Two part epoxy adhesive also available for installs that utilise glue for fixing
- Masonry, core drill and timber drill bits available from Tactile Systems for added convenience
