

Car Park Fixtures Surface Mount Bollards

Tactile Systems Australia range of Surface Mount Bollards are ideal for protecting both people and property.

Our bollards are available in a range of sizes and are manufactured to our high-quality standards and specifications.

All bollards are manufactured from high grade steel, then hot dip galvanised, before being powder coated to give a long lasting robust finish.

These are securely mounted via the fully welded mounting plate with four fixing points. 10mm x 100mm screw anchor fixings are also available for purchase.
