

Car Park Fixtures Surface Mount Bollard with Welded Flat Top - Stainless Steel

Tactile Systems Australia flat top, stainless steel bollards are ideal for protecting both people and property.

Our stainless-steel bollards are manufactured from 316 grade stainless steel, and then polished.

These bollards are suitable for indoor or outdoor applications, and their high-quality finish make them ideal for high grade or designer architectural applications.

These bollards are surface mounted via a fully welded mounting plate with 4 fixing points. Fixings are also available for purchase.
