

# Car Park Fixtures

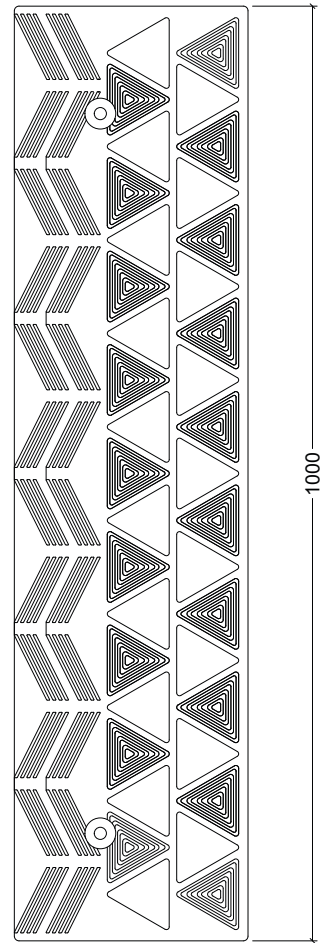

## Kerb Ramps - Rubber

**Tactile Systems Australia** Kerb Ramps are ideal for all types of areas where there is a large drop from the kerb. Made from high-quality rubber, these ramps are resistant to weather conditions, wear, and tear and feature yellow triangle areas for enhanced visibility.

Rubber kerb ramps are increasingly popular in Australia due to their durability, ease of installation, and flexibility in various applications. They provide a practical solution for temporary or permanent access needs in residential, commercial, and public settings.

Our ramps are 1000 x 250 x 90mm and include 2 fixing points.
