

Car Park Fixtures Threshold Access Ramp

Tactile Systems Threshold Access Ramp is the ideal solution to allow access to differing height areas such as door ways.

The TAR-50 is produced in slip resistant rubber and composite material to provide long service life, as well as robust construction to handle constant use from trolleys, wheel chairs etc.

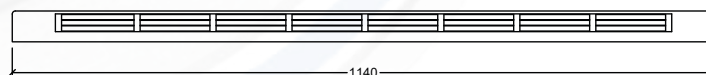

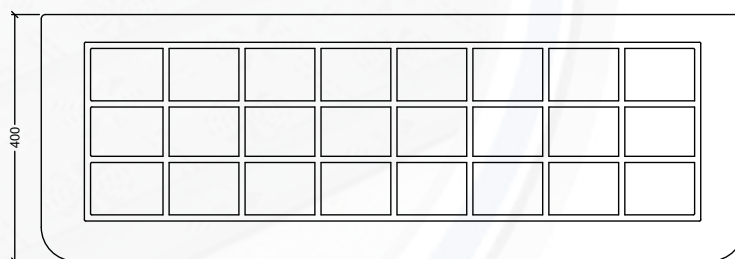

The Tactile Systems TAT-R-50 is suitable for wide range of applications including:

- Schools
- Aged care facilities
- Home or office
- Retirement homes
- Retail stores, restaurants etc
- Fully portable for delivery drivers or couriers – make deliveries easier and quicker

Features of the TAR-50:

- Slip resistant construction
- Simple installation
- Robust construction – will stand up to years of use
- Can be fixed in place using TSA-MS-2000 polymer adhesive for long last secure fixing
- Low cost solution especially when compared to metal or other ramp materials
- Set and forget, designed to be long lasting with proven hardwearing materials
- Chamfered edge allows access from the sides.
