

Car Park Fixtures – Surface Mount Bollards

Surface Mount Premium Bollard

Aesthetics:

Available in yellow or custom vibrant colors.

Durability:

Resistant to chipping, fading, and rust.

Installation:

Easily surface mounted with concrete screws.

As home and commercial energy systems become more common, protecting solar batteries, inverters and EV charging equipment from accidental vehicle impact is essential. The Surface Mount Premium Bollard is a simple, cost effective safeguard for installations in garages, carports and carparks. Its chip, fade and rust resistant finish ensures lasting performance, and the surface mount base fixes directly to existing concrete with screws, so there is no excavation or core drilling near sensitive cabling.
